

The Tempest Water Turbine blowers are the only blowers that run on safe, reliable water pressure. Use around dangerous chemicals and fluids such as gasoline, acetylene, natural gas, butane, propane, and other highly explosive materials. Using water from a high performance pump or even a hydrant or standpipe to create a huge volume of misted air (up to 30,000 CFM), the Tempest Water Turbine uses a fully-sealed direct-drive system that eliminates ordinary maintenance. Its on-demand water mist injector can help repress hazardous gases, cool down superheated rooms and even rejuvenate firefighters and fatigued rescue personnel.

WATER TURBINE BLOWER FEATURES

- Up to 30,000 CFM
- Dent-proof thermoplastic shroud
- Sealed, permanent lubricated bearings

MODEL	SIZE	POWER SOURCE	RPM	CFM	WIDTH	HEIGHT	DEPTH	WEIGHT
WTB-30	30"	22 hp turbine 250 gpm at 200 psi	2000	30,000	35.00"	35.00"	22.00"	75 lb
WTB-21	21"	10 hp turbine 175 gpm at 200 psi	3600	14,000	24.11"	24.57"	17.20"	30 lb
